**SUPPLEMENTARY INFORMATION:** Section 3405(e) of the Central Valley Project Improvement Act (Title 34 Public Law 102-575), requires the Secretary of the Interior to,

amongst other things, “develop criteria for evaluating the adequacy of all water conservation plans” developed by certain contractors. According to Section 3405(e)(1), these criteria must promote, “the highest level of water use efficiency reasonably achievable by project contractors using best available cost-effective technology and best management practices.” In accordance with this legislative mandate, the Bureau of Reclamation developed and published the Criteria for Evaluating Water Management Plans (Criteria). Each of the 15 entities listed below developed a Plan that Reclamation evaluated and preliminarily determined meets the requirements of the Criteria. The following Plans are available for review:
